

MLU1407 MGL 7KG

Technical Specifications

Max Wash Capacity	7kg
Variable Spin Speed	1200 rpm
Engine Type	BLDC Inverter Motor
Operational Voltage	AC 220-240 V
Rated Frequency	50 Hz
Water Consumption	51L/Cycle
Energy Consumption	0.62 kWh/Cycle
Noise Levels	60 dBA
Measurements	595x510x850 mm
Weight	56 kg
Programs	14
Special Washing Programs	Eco · Cotton · Synthetics · Delicate · Wool/Silk · Ironing · Anti Allergy · Outerwear Program · Jeans

6 Waves Technology

The benefit of 6 wave technology is that it rotates the drum in multiple directions. Rotating the drum in various directions cleans stubborn stains, as well as takes care of your delicate clothing so that they do not become damaged during washing.

Extra Rinse and Spin

Extra rinse and spin are mainly used for underwear and some clothes with the detergent residue limitation. The washing machine will add a rinse and spin process one more time if you select this function.

Time Delay and 15 or 42-minute Quick Wash

Set the delay start time from 3 hours to 24 hours separately. After the time your set runs out, this machine will start to work with the set program. In a hurry? Then start a 15-minute or 42-minute quick wash and save energy.

Big LED Control Panel with Touch Buttons

Easy to set the laundry procedure, great user experience.

Baby Wash and Sensitive Skin Program

Quite intensive wash program at a high temperature, followed by several rinses to make sure as much detergent is removed from the clothes as possible.

Easy Care and Synthetics Programs

Easy care washes at lower temperatures and spins less frequently. Choose this for some delicate clothes made from polyester and viscose.
